KEY TAKEAWAYS

It costs $39 once, with no subscription and instant digital delivery.

A 90-day money-back guarantee through ClickBank caps your risk (terms apply).

Benefit claims come from the official site; Akacen Media has not tested them.

About this guide

Akacen Media read the official product website and checked each price, guarantee and safety statement against it. We did not test the audio ourselves or validate the research it cites. Where a fact is missing, we say so instead of guessing.

The official page publishes no customer ratings, and the product's affiliate terms forbid testimonials, so this guide contains no reviews, scores or before-and-after claims.

The short answer

The Genius Wave is an audio session that plays for 12 minutes on any phone or computer. It is designed to guide the brain toward Theta activity, which researchers associate with relaxed alertness and creative flow.

It suits people who want a short routine instead of a pill or an app subscription. It is not a medical device, and the official site says it is not intended to diagnose, treat, cure or prevent any disease.

Key facts at a glance

Fact	What the official page states
Format	One audio session, about 12 minutes, digital download
Price	$39 one-time, no subscription listed
Delivery	Instant digital download, nothing ships
Guarantee	90-day money-back guarantee, terms apply, via ClickBank
Ownership	Your copy is yours to keep
Ratings	No customer star rating is published

What it is not: a supplement, a medical treatment or a guaranteed result. There are no physical ingredients, so there is nothing to swallow.

How a daily session works

A session is one audio file that you play through headphones in a quiet spot, once a day, for about 12 minutes. You need no special equipment and no meditation training.

Your 3-step routine

1	**Buy and download** Delivery is instant, so there is nothing to wait for or ship.
2	**Press play in a quiet room** Use headphones and sit still for the full 12 minutes.
3	**Repeat at the same time daily** A fixed slot makes the habit easier to keep.

The official site suggests three moments: first thing in the morning before email, during the post-lunch slump, or just before deep work. Pick whichever one you can protect.

Treat the first two weeks as a trial. If you notice no change after steady daily use, you still have the refund window.

Safety first: never play the session while driving or operating machinery.

A quiet corner is enough: headphones, a chair and 12 minutes.

Price, delivery and refund

The Genius Wave costs $39 once, with no subscription or renewal fee listed on the official site. Spread over a year, that is roughly 11 cents a day.

How the 90-day refund works

The purchase carries a 90-day money-back guarantee, and terms apply. ClickBank is the retailer, so refund requests go through ClickBank rather than the creator.

Step	What to do
1	Keep the receipt email. It holds your order number.
2	Contact ClickBank with that order number inside the 90 days.
3	Follow the steps ClickBank gives you to complete the refund.

The official page shows no bundles, coupon codes or discount tiers. Read the guarantee terms at checkout, since the merchant sets them and they may change.

Who should buy and who should skip

Use this quick check before you decide. If a Skip it if line sounds like you, speak with a doctor first.

Best for

Yes You want a short daily audio routine, not a pill

Yes You prefer paying once, with no subscription

Yes You value a 90-day refund window (terms apply)

Skip it if

No You have a seizure, hearing or neurological condition and have not asked a doctor

No You expect a medical treatment or a guaranteed result

No You would listen while driving or using machinery

Pros and cons

What we like

+ One payment of $39, no subscription listed
+ Only 12 minutes a day
+ Instant delivery, nothing to ship
+ 90-day refund window through ClickBank

What to weigh

- Benefit claims are not independently verified
- No customer ratings on the official page
- Audio only: not a medical treatment
- Needs a doctor's view for some conditions

Our read: the risk is small and clearly capped, but the benefit is the publisher's claim, not ours. Give it a fair few weeks of daily use, then decide.

Safety, limits and alternatives

Talk to a physician before listening if you have a seizure disorder, a hearing condition or a diagnosed neurological condition. Never play the session while driving or operating machinery.

The official benefit claims are about clarity, focus, memory and creative thinking. These are wellness claims that the US Food and Drug Administration has not evaluated.

How it compares

Compare	The Genius Wave	Focus apps	Coffee or supplements
Price	$39 one-time	Varies; many charge monthly or yearly	Ongoing purchases
Guarantee	90 days via ClickBank, terms apply	Varies by app	None for coffee; varies by brand
Ingredients and features	No ingredients; 12-minute Theta audio	Software features such as timers	Caffeine or other ingredients by mouth

Verdict: choose The Genius Wave if you want a one-time, nothing-to-swallow routine. Choose another option if you want ongoing app features or an instant stimulant.

How we evaluated this

Akacen Media read the official product website and compared each price, guarantee and safety statement with it. We did not test the audio and we did not validate the research the publisher cites.

Questions answered

Is The Genius Wave just relaxing music?

No. The official site describes engineered audio made by sound engineers and neuroscientists, using non-invasive sound frequencies meant to guide the brain toward Theta activity.

Is there a monthly fee?

No. The official site lists a single $39 payment with no subscription, recurring charge or renewal fee.

What does the official site say it supports?

Mental clarity, focus, memory and creative thinking. These are wellness statements, not disease claims.

What if it does not work for me?

The 90-day money-back guarantee applies, and terms apply. Request the refund through ClickBank with your order number.

Who should talk to a doctor first?

Anyone with a seizure disorder, hearing condition or neurological diagnosis. Nobody should play it while driving.

Why are there no customer ratings?

The official site publishes none, and the affiliate terms forbid testimonials, so we never invent scores or reviews.

Final verdict

The Genius Wave is a reasonable, low-risk trial if you want a short audio routine, you are comfortable paying $39 once and you value the 90-day refund window.

It is the wrong choice if you need medical treatment, expect guaranteed results or have a condition that calls for a doctor's approval first.

Before you buy

1. Confirm your device plays standard audio files and you have headphones.
2. Check the $39 price on the checkout page, since the merchant can change it.
3. Save the receipt email and note the date, so you can count the 90 days.
4. Never listen while driving, and ask a doctor first if a Skip it if line fits you.
